

Top Tips for Creating Artwork from Caroline de Peyrecave

1. Never underestimate the importance of drawing.
2. Take a black and white photo to help with tonal values to create a life like 3D effect.
3. Stand back from your work to get perspective on it and see it as a whole.
4. Have your work vertical when working so you can see it as it would be when hanging.
5. Loose and effortless effects can only be achieved once you've mastered control.
